

## turn ideas into products

- **CUSTOMIZED SMART Electronic MODULES**  
harsh environment – high reliability - high voltage insulation
- Improve reliability by **potting & sealing**
- **CONTRACT SERVICES:**  
PLASMA, GLUING, POTTNG, FIPG, SELECTIVE COATING

## at the heart of your automation

- In-house **bonding, sealing and dispensing**
- **Automated assembly solutions**
- **System integrator** with materials & product design consultancy

## In house PRETREATMENT, BONDING, SEALING, DISPENSING & curing processes CONTRACT SERVICES

## Precision CNC dispensing for reliable and cost-effective gasketing

multilayer - precision - perfect start/stop - 3 D - fast

## Overmold & potting of electronics for harsh environment

### sealing for high reliability

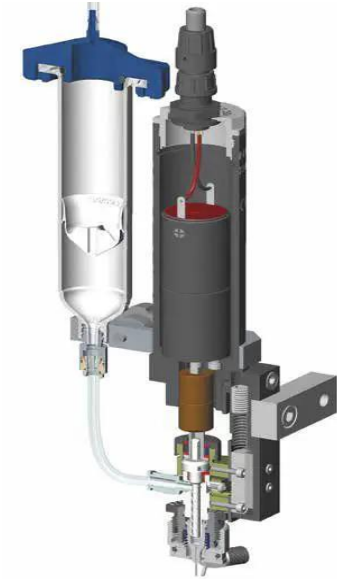

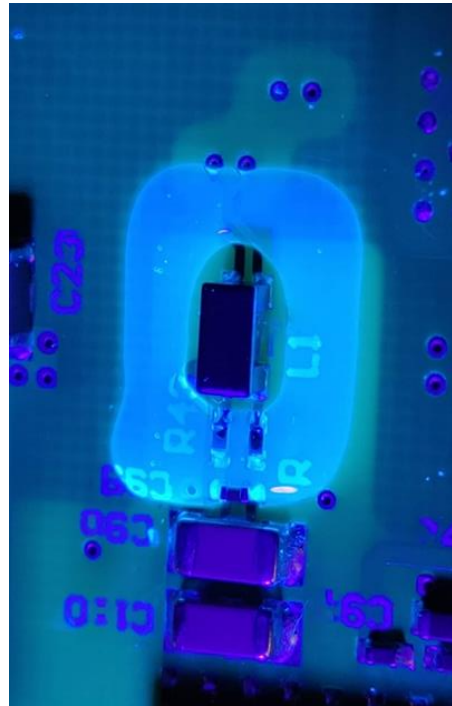

Epoxies - PUR - silicone gel

high temperature range - excellent adhesion - mechanical robustness - chemical resistance

## Precision selective coating: dual cure UV curing technology

New technology

Precision volumetric dispensing with Auger pump  
(picture: property of NORDSON EFD)

Controlled position & layer thickness – dam & fill – no solvents – multi layer – high voltage insulation

## at the heart of your automation

- In-house **bonding, sealing and dispensing**
- **Automated assembly** and **Test & Measurement** solutions
- We automate **following your project growth**
- **System integrator** with materials, product & process design consultancy

at the heart of your automation
